FOR IMMEDIATE RELEASE

Order of six (6) type approved ADVETO ECDIS-4000 secured for Tide Sjø's High Speed Crafts in Norway

Swedish ADVETO has through its distributor Westronic in Bergen secured an order for three newbuild High Speed Crafts (HSC) passenger catamarans. Each newbuild HSC will be equipped with paperless Dual-ECDIS from Adveto.

The new order represents the ongoing upgrading program to make all Tide Sjø's High Speed Crafts (HSC) compliant with the IMO resolution stating that "all HSC should be fitted with an ECDIS".

Tide Admiral (above) is similar to the newbuilds and has already dual ADVETO ECDIS-4000 onboard

“ADVETO has the best ECDIS on the market for the HSC vessels”

“Westronic started to work with ADVETO's ECDIS four years ago. I must conclude that according to my opinion ADVETO has the best ECDIS on the market for the HSC vessels” says Arild Mathiessen, Sales & Project Engineer at Westronic AS in Bergen.

“ECDIS-4000 from ADVETO has features like multi routes, advanced predictors, the alternative night presentation and download of PRIMAR charts and chart updates over Internet directly into the ECDIS. This makes ADVETO ECDIS an ideal system for HSC operation.”

“We are proud that Tide Sjø with their many High Speed Crafts has chosen Westronics and our ECDIS for this upgrading program” says Kent Sylvén, Managing Director of ADVETO. “Even more so since Norway is one of the most densely populated HSC areas in the world and Tide Sjø is the largest operator in Northern Europe.”

ADVETO

ADVETO Advanced Technology AB has been in the Electronic Navigation industry since the mid 1980's. ADVETO systems are used all across the world on all types of ships and by many National Maritime Administrations. They have become increasingly popular onboard High Speed Crafts and especially with those operating in archipelagos. The majority of our users are still found in Scandinavia but with a rapidly growing number of users around the world.
