FOR IMMEDIATE RELEASE

ADVETO provides Compact Vessel Traffic System (CVTS) software for Ghana Port Authority

ADVETO will provide through True Heading (publ) in Stockholm 6 (six) CVTS software licenses for Ghana Port Authority. The CVTS licenses are part of a complete AIS and surveillance system delivered by True Heading (publ).

The delivery from True Heading (publ) to Ghana Port Authority also consists of AIS hardware from True Heading besides the CVTS software from ADVETO. The complete delivery will be performed during September 2011.

“We have chosen the ADVETO CVTS software for the delivery to Ghana Port Authority”, says True Heading’s Managing Director Anders Bergström. “The ADVETO CVTS software has proven not only to be very reliable but also to provide an AIS presentation fulfilling the latest international standards”.

“We are proud that we have been chosen to deliver our CVTS technology to this high status delivery” says Kent Sylvén, Managing Director of ADVETO. “The current version of our CVTS is the third generation. Our first Vessel Traffic Presentation was

delivered as early as 1993 and was then the first in the world to be able to present AIS”.

ADVETO

ADVETO Advanced Technology AB has been in the Electronic Navigation market since the mid 1980's. ADVETO systems are used all across the world in and around all continents by work boats, tow boats, ferries and ocean-crossing cruise-liners, pilot boats, and training ships. The third generation of the ADVETO CVTS systems are developed for and conforms to all applicable standards. They are used mainly in Scandinavia but have a rapidly growing number of users around the world. In addition to the National Maritime Administrations in Sweden, Norway and Denmark, the corresponding bodies in Poland, Spain and Argentina are also ADVETO users and so are customers in many important harbours around the world.

True Heading (publ)

True Heading AB provides years of experience in the telematic and AIS field. Its extensive network of resources gives this small company the profile of a large and the capacity of achieving complex goals in a flexible and customer adapted way at the same time as they offer quick results at a low cost. True Heading is able to provide turnkey solutions within its entire range of services and is committed to providing top quality services to its partners and clients.

They are proud to say that True Heading knew AIS before it was invented. The directors of True Heading have over 40 years of experience in navigation. This experience extends from professional navigation and surveying within administrations and navies to radio and product design in multinational companies – even specializing in AIS when it was first being developed in Sweden. They are all passionate sailors and yachtsmen that love what they do, so they always ensure their products are developed to a standard that they themselves are happy to rely on when it really counts. True Heading is noted on the Stockholm smallcap list “Aktietorget” since 2010.
