### **225 ECDIS STM systems - Adveto is one of three selected suppliers**

”We are proud to be one of the selected ECDIS suppliers in this fine and prestigious project. We have produced ECDIS since many years, now it’s time to connect the systems with each other, that’s why we participate in STM.” says Kent Sylvén, Managing Director of ADVETO.  
“We are pleased to assign contracts with the market leaders and fore-running vendors, who together with the project can take a lead in the future development.” says Björn Andreasson, Test Manager Swedish Maritime Administration.

#### **Short about STM validation project**

Starting 2015 and running till the end of 2018 the STM Validation Project will demonstrate the STM concept in large-scale test beds in both the Nordic and Mediterranean Seas, encompassing around 300 vessels, 10 ports and 5 shore based service centers as well as using the European Maritime Simulator Network. The key strategic enablers of STM will be tested and validated.

The STM Validation Project has a total budget of approximately 43 million euros. 50% is co-financed by the EU (Connecting Europe Facility/Motorways of the Sea)
