### **New ECDIS-4000 type approved software upgrade - Now available from Adveto !**

"We are proud to be able to offer a preslib 4.0 upgrade as one of the first ECDIS manufacturers. Our upgraded ECDIS certificate also supports STM and the new RTZ route format." says Kent Sylvén, Managing Director of ADVETO. "Please note that this is a pure software upgrade and that the existing Adveto ECDIS hardware still can be used".

There is a grace period meaning that the old existing ECDIS systems are allowed to work as type approved ECDIS until 31<sup>st</sup> August 2017 without any changes.  
(The grace period was recently extended from 31<sup>st</sup> August 2016 to 31<sup>st</sup> August 2017 by IMO NCSR)  
After this grace period all ECDIS on the market needs an upgrade in order to maintain the type approved status.

#### **ADVETO**

ADVETO Advanced Technology AB is a real pioneer in Electronic Navigation Systems. ADVETO started already in the mid 1980's. ADVETO systems are used all across the world on all types of ships and by many National Maritime Administrations. They have become increasingly popular on board all kinds of vessels from High Speed Crafts to SOLAS vessels and especially at those operating in archipelagos. The majority of our users are still found in Scandinavia but with a rapidly growing number of users around the world.
