

Important information regarding ECDIS-4000

Monday, 4 April 2016
FOR IMMEDIATE PUBLIC RELEASE

1/ Current ECDIS-4000 status

All the current ECDIS-4000 systems (no matter if BASE, STD or EXT versions) are equipped with IHO presentation library v3.4.

There is a grace period meaning that these systems are allowed to work as type approved ECDIS until 31st August 2017 without any changes.

(The grace period was recently extended from 31st August 2016 to 31st August 2017 by IMO NCSR)

After this grace period the ECDIS-4000 systems need an upgrade in order to maintain the type approved status.

2/ The ECDIS-4000 upgrade

Adveto will soon be able to offer its customers a software SW upgrade. Please note that no hardware is affected and that the existing Adveto ECDIS hardware still can be used!

What we can understand is that some other ECDIS manufacturer brands need hardware exchange. We are proud to communicate that the customers of Adveto have a good position here as replacing or changing hardware can result in an expensive affair.

The work has already started and we plan to release this important upgrade with good margin before the grace period ends.

3/ Upgrade conditions

Our customers will soon hear from us regarding conditions and terms for the upgrade on board.

ADVETO

ADVETO Advanced Technology AB is a real pioneer in Electronic Navigation Systems. ADVETO started already in the mid 1980's. ADVETO systems are used all across the world on all types of ships and by many National Maritime Administrations. They have become increasingly popular on board all kinds of vessels from High Speed Crafts to SOLAS vessels and especially at those operating in archipelagos. The majority of our users are still found in Scandinavia but with a rapidly growing number of users around the world.
